Introduction

Phishing is the top cyber incident in the fraud category.

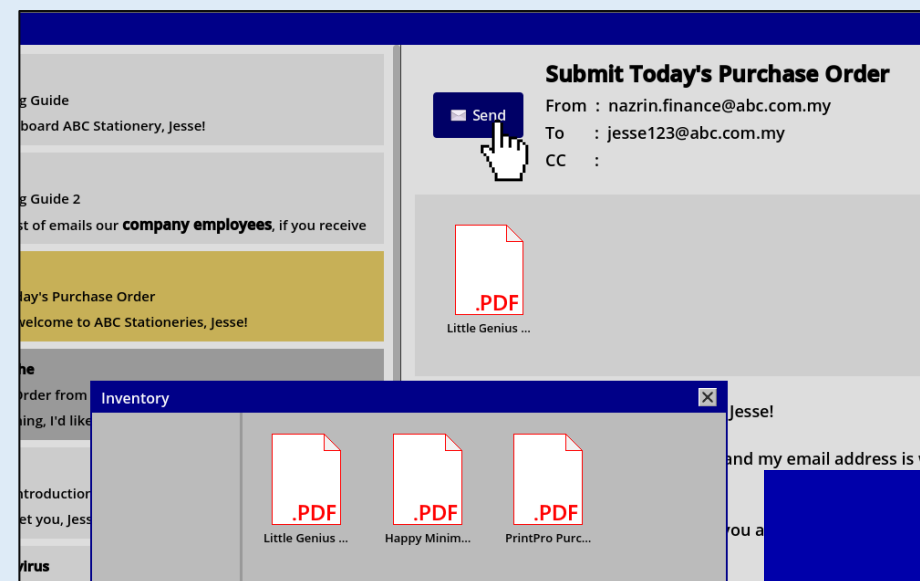

With **1160 incidents** in months July, August and September 2025 according to MyCERT.

Current methods of training such as PowerPoint reading and Q&A Forms are insufficient.

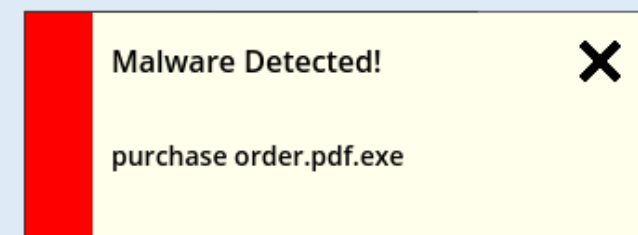

Project Objectives & Details

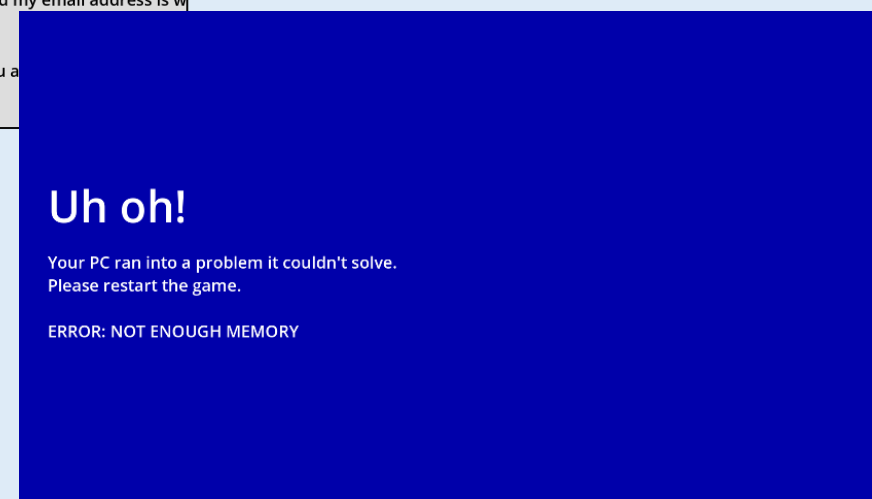

This project aims to increase the general public's cyber awareness via game as it is more stimulating and entertaining.

Complete Tasks

Identify Threats

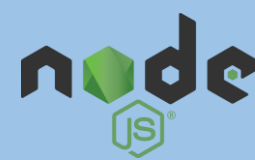

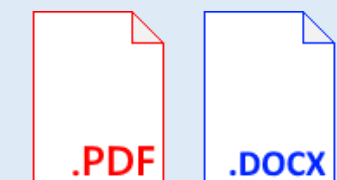

Explore What Happens

Conclusion

User learns better when they have more interaction and feedback. It also helps improve retention.

This game is a place where users can experience what happens if they are not equipped with cyber awareness.
